**Requirements and Documentation of Compliance
For Operation Of
Elmgrove Street Underground Storage Tanks (USTs)**

- 1) Notification to Department of Ecology (copy attached).
- 2) Permit Issuance by DOE (copy of tag attached).
- 3) Annual payment of fees to DOE and certification by LPC of compliance (copy attached).
- 4) Financial responsibility (copy of Insurance Certificate attached).
- 5) Tank corrosion protection per WAC 173-360-305 (1)(c). Tank is "Permatank" steel with corrosion proof fiberglass wrap construction (copy of specifications, warrantee registration forms and photo as installed attached).
- 6) Release Detection per WAC 173-360-335. Tank is equipped with automatic electronic tank monitoring system, which satisfies the requirement for monthly monitoring (copy of EPA tests of the monitoring equipment as installed and tank test reports attached). Release detection in suction type product lines as installed is not required per WAC 173-360-350 (2)(b).
- 7) Yearly (minimum) operation of the automatic tank monitor in test mode (copy of printout attached).
- 8) Notification to PSCAA of gasoline UST (copy of Notice of Completion attached).
- 9) Order of approval from PSCAA to construct gasoline UST (copy attached).
- 10) Installation of approved vapor recovery system (initial test reports attached).
- 11) Annual inspection of vapor recovery system (Yr. 2000, 2001 and 2002 test reports attached).
- 12) Out of Service Requirements (currently complying per UFC 7902.1.7.2.2 "Out of Service 90 Days" requirement).
